EPRINTS SERVICES

Repository Basic Starter Kit

The Repository Basic Starter Kit will get your pilot repository up and running within one week by providing you with a fully functional Institutional Repository that provides what you need today backed by the expandability to grow with your future requirements.

The Basic Starter Kit consists of an EPrints version 3 repository with standard deposit types, metadata and workflow that is customized for
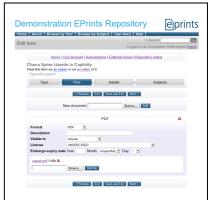

- institutional visual identity

- institutional structure for browsing and searching

- institutional authentication for registered user accounts.

All Basic Starter Kit customers have access to the EPrints technical support mailing list, web site and EPrints Open Source technical documentation.

BOLT-ON EXTRAS

- Training for repository manager and administrator.
  How to deploy and manage your starter repository. Understand the expansion capability of your repository to plan for future requirements. (2 day offsite training for two people). Highly recommended.

- One month telephone and email priority support line.
  Same working day response means your questions answered quickly and problems resolved promptly. Recommended.

- One year's hosting and backup.
  Invaluable if you lack spare technical or administrative capacity to host the repository yourself.

- Consultancy and bespoke development.
  EPrints is an open source, highly extensible system that scores high on interoperability, but not every institution has spare technical programmer effort. Recommended if your expertise is tied up with other activities and you need help integrating with legacy systems or institutional infrastructure.

EPrints version 3 is the latest release of the popular EPrints open source repository software. It is redesigned to improve the user experience by streamlining deposits, data entry, workflow and export capabilities. Featuring auto-completion of authors and journals, flexible tabbed workflow interface and extensible export plugins, depositing and managing research articles, scientific data and multimedia objects of all kinds has never been easier.
